

Capture ink and ideas from your whiteboard to your computer instantly with

mimio[®]

"mimio is AWESOME! Everybody raves about how they could use this product on a daily basis, since much of our client education is done with verbal and visual descriptions. . . No longer will we be restricted to faxes or the phone line when trying to work together."

— C. Dennis Brislawn, Jr., Principal Attorney Member, Brislawn Lofton, PLLC

"Before mimio, [a secretary] was using a digital camera to photograph the whiteboard notes after a meeting, then transcribing them so she could print and hand them out. With mimio, she just pushes a button to save everything, and another button to print. mimio is terrific!"

— Guerino D'Amato, Jr., IT Customer Solutions Investigator, Advo

You need to communicate efficiently and effectively – sharing information, exchanging points of view and creating solutions. If you use a whiteboard to communicate, then you need mimio.

mimio is the award-winning collaboration tool that works with your whiteboard to immediately improve the way you communicate. Simply attach mimio to any whiteboard, and everything you write or draw is seamlessly captured to your computer, in color and real time – ready to save, print, edit and share with anyone, anywhere in the world. You'll increase productivity because people can concentrate on sharing ideas, participating in discussions and solving problems, instead of taking notes.

Easy, intuitive, versatile, affordable.

You don't need an expensive electronic copyboard – just a regular whiteboard, and mimio. For a fraction of the cost of an electronic whiteboard or copy board you will have a tool that is truly portable and more versatile.

mimio is simple to install and even easier to use, so it's the ideal tool for every meeting, class or collaboration session. And because mimio INK files can be saved, edited or exported in so many ways, they're compatible with a wide range of applications:

- Save as JPEG, BMP, WMF, EMF and export as SVG, EPS, HTML
- Attach files to email, or export to HTML to share over the Internet
- Copy and paste notes into any Windows[®] application
- Print notes for instant distribution during a meeting or presentation

mimio software now allows customers using multiple whiteboards or flip charts to record these notes simultaneously to the same computer.

Take your collaboration global.

When team members are in different rooms or different time zones, visual communication can be difficult. With a mimio-equipped whiteboard, it's easy to collaborate with associates around the world – without leaving your office.

Share your whiteboard through an online meeting at the mimio.com Meeting Center, powered by WebEx[®], or use the whiteboard feature in Windows NetMeeting[®]. Either way, everyone on your team will be able to see your whiteboard and share their ideas in real time.

You can also save and replay your entire whiteboard session later, page by page, with mimio's VCR-like playback feature. You'll be able to review the dynamics of the collaboration process, not just the results.

The perfect traveler.

mimio is lightweight, portable and durable. It fits in a briefcase and requires no separate power source so there's no country-to-country incompatibility. Your mimio is ready to go — anywhere, any time!

mimioMouse™ - the perfect way to present.

- Display your desktop on the whiteboard with an LCD projector and use mimioMouse like a cordless mouse to run any application.
- Then change to the mimioMouse annotation mode, and write notes right on the projected screen!
- When you save or print the screen, your handwritten notes are included just as they appear on the projected image.
- You can also use a mimio stylus to write on the actual whiteboard, and save those notes as well.

mimio package

Your mimio kit includes everything you need:

- capture bar and mounting brackets
- four styli (red, green, blue & black), standard dry-erase markers, and batteries
- eraser and holder
- software CD-ROM and manual
- 16' (5m) serial cable
- control panel
- mimioMouse pointer insert

System requirements

IBM-compatible 100 MHz Pentium required, (166 Mhz or higher Pentium if using Microsoft NetMeeting), Windows 95/98/2000/NT4.0, 16 MB RAM (32 MB recommended), Minimum of 10 MB free hard drive space
